DETAILED ACTION

Response to Amendment

The examiner acknowledges the amending of claims 1, 6, 18, and 22, as well as the cancellation of claims 2 and 8. It is believed that the amended claims do not change the scope of the previously submitted claims, and the amendment will therefor be entered.

Response to Arguments

Applicant's arguments filed 04/10/2006 have been fully considered but they are not persuasive.

The applicant attests that the combination of Patrick Jr. with Riaziat and Spangler would teach an inoperable device.

The examiner does not agree with the applicant's position. First, in the applicant's remarks, it is stated that the combination of Patrick Jr.'s "bleed resistor" with Riaziat and Spangler would make the device inoperable; however, the examiner did not rely on Patrick Jr. to teach the bleed resistor element, but instead the acutely shaped end of the bleed resistor. As stated in the previous rejection to the claims: "Patrick teaches an acutely shaped conductor which is used to facilitate ESD discharges (col.3 lines 10-15). It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the laser diode ground connector of Riaziat and Spangler, used for ESD protection, with **the acute shape** taught by Patrick in order to further attract ESDs to the ground connector to protect the various circuit elements." As has been highlighted here, the inclusion of the bleed resistor was not that which was

Application/Control Number: 10/719,021 Page 3

Art Unit: 2828

motivated, but instead, the shape of the conductor was motivated. As Patrick teaches this shape to assist in the concentration of static electricity, it is believed that proper motivation is provided for the use of the shape in combination with the ESD protection connectors of Riaziat and Spangler.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tod T. Van Roy whose telephone number is (571)272-8447. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minsun Harvey can be reached on (571)272-1835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
